

## **Section G: Apiary and Dairy**

### **Important information from the DPI**

**Wax:** must have been heat treated and formed into block ready for sale, no raw wax to be displayed or accepted

**Jars of Honey:** all jars of honey must have been processed by filtering all wax and bees out of honey before bottling and kept in bee proof manner.

**Full Frame of Honey & live Bees Exhibit:** This would be the greatest risk but if you only receive frames from the General (blue) zone entries are accepted this risk is reduced and follow the additional conditions as below

- **Need to supply Hive Movement declaration for the frame movement to show society**
- **Completed the Tocal varroa mite training within the previous 12 months**
- **Must be a registered bee keeper if sourced from European honey bees and supply details to Show society**
